Plan: 29 to add, 0 to change, 0 to destroy.

Changes to Outputs:
  + alb_dns    = (known after apply)
  + bastion_ip = (known after apply)
  + vpc_id     = (known after apply)

Note: You didn't use the -out option to save this plan, so Terraform can't guarantee to take exactly these actions if you run "terraform apply" now.
